**Subject:** 2014 CMI Field Investigation Work Plan - 9-5-2014.doc

Mr. Ruopp,

The EPA approves the 2014 CMI Field Investigation Work Plan - 9-5-2014.doc with the following comments:

1. "If VOCs are found in these wells, Central Wire will discuss the next steps with EPA before taking any additional action." Techalloy will provide EPA with the analytical data from the sampling effort within three weeks of collecting the samples. If maximum contaminate levels (MCL) are exceeded in any of the leading edge of the plume samples locations, then Techalloy will continue sampling until the edge of the plume is determined. The EPA requires at least two weeks' notice before any new site work begins.
2. Minor issues: Table 2, sampling dates are reported as Oct. 2012. This date appears to be incorrect.
3. In Tables 1 through 3 all report the same sampling locations. Is this accurate?

If you have any questions please contact me.

Respectfully,

John Nordine, CPG, LPG
